

2017-2018 Project **W.E.T.** Workshops

Presented by
School Water Education Program
Solano Resource Conservation District

When are the 2017-2018 Workshops?
September 23, 2017 (K-6th teachers)
February 24, 2018 (7th-12th & college)

What is Project W.E.T.?

The Project W.E.T. curriculum is for K-12 classrooms, water themed, hands-on, STEM-friendly, multi-disciplinary, engaging and enriching, and aligned with Common Core & Next Generation Science Standards.

How can we meet your curricular training needs in 2017-2018?

Two separate trainings will be offered in the 17-18 school year. These workshops will differentiate Project W.E.T. curriculum by focusing on the specific needs of Solano County teachers. Register for the September session for K-6th or the February session for 7th-12th and college educators. Administrators, curriculum coaches, and other support staff are welcome at either session. *Each workshop will feature Solano County water resources specialists who will provide information about our local water resources.*

Who may attend?

ANY Solano County educators! *\$50 teacher stipend for the first 20 teachers!*

Teacher Teams

- ▶ S.T.E.A.M./S.T.E.M. Departments
- ▶ Learning Academy teams
- ▶ Grade level/department teams

Educational Support Personnel
